
Variables

Controlled variables:

- Same amount of soil in each pot.
- Same type of trays.
- Same amount of water put into the plants.
- Same temperature
- Same lighting
- The time I measured the plants; the plants were measured once a day for 7 days.

Independent (Manipulated) variable(s):

- The amount of Miracid given to the plants.

Dependent (Responding) variable:

- The growth of the plants.
