

Science 7

Chapter 2, "Living and Non-Living Things Interact In Ecosystems"

Food Chain

Food Chain:

- ▶ Create a **food chain** connecting at least five organisms found in Newfoundland and Labrador.

[] - [] - [] - [] - []

Food Web:

- ▶ Create a food web using organisms found in Newfoundland and Labrador. Make connections within the web using lines. Label each organism as belonging to either the **herbivores**, **carnivores** or **omnivores** component of the food web.

Diagram for creating a food web. It consists of nine empty rounded rectangular boxes arranged in a 3x3 grid. Each box has a horizontal line above it, intended for labeling the organism and its trophic level.
