

Science Research Topics

The following is a list of suggested science research topics. Some of these topics are broad and require students to narrow them to specific topics.

- Benjamin Franklin
- Thomas Edison
- Aristotle
- Galileo
- Louis Pasteur
- Guglielmo Marconi
- Bill Gates
- The Wright Brothers (Flight).
- The history of communications: Telephone, Wireless, Satellite, computers, etc.
- The Space shuttle: Atlantis, Voyager, Columbia, etc. (Space Travel).
- Space: Comets, Quasars, Pulsars, nebulas, Stars, etc.
- Solar System: Planets - Mars, Venus, etc.
- Cloning
- Ecosystems: Desert, Tropical Rain Forest, Ocean, Arctic, etc. (Mysteries of...).
- Pollution: Acid, Toxic, chemical, etc.
- Recycling
- Glaciation
- Nuclear Energy/Alternate Sources of Energy: Solar, Wind, Fusion, Geothermal, etc.
- Natural Disasters: Tornado, Earth Quakes, Hurricanes, etc.
- Medical Drugs
- Diseases: Diabetes, Cancer, etc.
- Dinosaurs: Palenotology, Survival, etc.
- Scientific Inventions: Microscope, Thermometer, X-ray, etc.
- Scientific Careers: Meteorologist, Archaeologist, Paleontologist, Medical Doctor, etc.
- Microbes
- Creation vs. Evolution
- The Science of Gardening
- The Human Body: The Digestive system, the circulatory system, Hearing, Vision, etc.
